LED ALUMINUM PROFILE · INSTALLATION

Installation Guide

PART NO. **NL-AP-4535-2M**

RECESSED CEILING INSTALLATION · AT THE WALL CORNER

1. Cut the ceiling opening tight to the wall so the profile sits flush against the wall corner.
2. Install one line of LED strip in the channel and fit the frosted cover.
3. Fit the end caps (NL-AP-4535-C), set the profile into the ceiling and finish flush.

THE LIGHT EFFECT

WALL-GRAZING LINE OF LIGHT

Mounted in the ceiling right at the wall, the 4535 hides the LED strip from view and washes the wall below with a soft, even line of light. The frosted cover diffuses the strip for a clean, continuous glow.
